Address:

Mendenhall Valley, Juneau

Price:

400.00 \$

This is the full suspension system from a 2013 10th Anniversary Wrangler. It only has 20K miles of on road use. The set includes:

- Front Control Arms (Upper and Lower)
- Rear Control Arms (Upper and Lower)
- Track Bars (Front and Rear)
- Sway Bar Links (Front and Rear)
- Springs (Front and Rear)
- Gas Shocks (Front and Rear)

10th Anniversary Rubicon's with a towing package and a hard top were delivered with springs that tended to be stiffer than those found on a Wrangler Sport and longer travel shocks. I ran 32" tires with ample clearance so depending on your rig this could be a great way to upgrade your jeep to get a lift and a firmer ride. Replacing your aging control arms with these lightly used ones is also a great way to get rid of that annoying squeak.

Check out my other listing if you want Mud Terrain Tires!
